Subject: GC/MS Quality Improvement

Moving forward I'd like to make certain each GC/MS instrument receive at least one injector preventative maintenance (P.M.) per month. In addition to the maintenance log book, I will create an internal QC spreadsheet that documents the GC/MS system, the date of the injector P.M. and the chemist who performed the P.M. I will also add a few fields for source cleanings, filament replacement and rough pump oil changes. Lastly, I need volunteers for the monthly injector P.M. so let me know if you are interested.
